Issue 7

welcome

Hello and welcome to the 7th issue of the Plugin Deals Magazine!

June is here and it's finally summertime :)

As usual, we bring you the latest plugin news and deals so you can make great music. If you're feeling lucky please visit our website, spin the wheel and win amazing plugin discounts offered by our generous sponsors!

Unfortunately the Coronavirus threat is still present so make sure you also take the proper measures, stay home if possible and be safe.

Have a creative June, dear friends!

Supermassive by Valhalla

ValhallaSupermassive is designed to blow your mind and your music to new levels of consciousness and experience! Luscious clouds of reverb, otherworldly delays, swelling waves of feedback unlike any you've heard before. Supermassive uses a variety of feedback delay networks, where each delay in the structure can be up to 2 seconds long. Combine these long delays with the unique WARP control, and the results range from echoes that slowly fade in, to cascading harmonic echoes, to lush reverbs, onwards to reverbs that decay way over the course of minutes.

> Deal

Crystals is an iconic H3000 Harmonizer® effect, combining twin reverse pitch shifters with reverse delays and reverb to create out-of-this-world sounds. Save 60% off and buy now for only €39 / \$39. Ends July 6, 2020.

Eventide Crystals combines twin reverse pitch shifters with reverse delays and reverb. This iconic H3000 Harmonizer® effect can be used to create out-of-this-world climbing and cascading pitched delays or to create unique sounding reverbs. It features two reverse granular delays that can be manipulated by length and pitch. Crystals excels at adding life to synths, guitar, and vocals making them sound huge and majestic. From sound design to other-worldly solos, Crystals will spark inspiration.

Introducing **Scaler 2**, the inspirational and powerful music theory workstation that gives you access to a world of new ideas, expressions and melodies. Save up to 35% off with prices starting from £19 / \$19, for a very limited time only. Ends July 1, 2020.

Scaler 2 is an inspirational and powerful music theory workstation that gives you access to a world of new ideas, expressions and melodies. With powerful detection of MIDI and audio, Scaler 2 can determine what key and scale you're in and suggest chords that match your music. The plugin helps you discover the perfect melody with performance expressions, and can even suggest ways to change from one key to another.

The promotional banner features a blue background on the left with the Plugin Boutique logo and the text 'Scaler 2 Empower the composer within *Ends 30th June'. On the right, a screenshot of the Scaler 2 software interface is shown, featuring a piano roll, a chord progression list, and a red circular badge indicating 'UP TO 35% OFF'. A blue button at the bottom right of the interface reads 'Upgrade from £19 / \$19'.

> Free Stereo Width Plugins

Ozone Imager V2: Control the width of any track, perfect for making super-wide sounds or creating narrow, mono-like sources. Make your pianos, synths, and cymbals fill up your stereo image, or tighten up your low end by narrowing bass and kick drums!

izotope.com/en/products/ozone-imager.html

Wider is a unique stereo plugin in the sense that it is completely “mono-compatible”, meaning that any signal that has been extended will always remain in phase with itself, even if summed to mono.

polyversemusic.com/products/wider/

Stereo Touch is most effective on monophonic sounds without overly sharp transients: it works great for both acoustic and electric/overdriven guitars, synthetic pad sounds and even vocals.

voxengo.com/product/stereotouch/

With the A1StereoControl plugin you will be able to expand or limit the STEREO WIDTH of your tracks using only one single knob.

alexhilton.net/A1AUDIO/index.php/a1stereocontrol

Black Rooster Audio launches the KH-COMP1

Black Rooster Audio has launched a collaboration with esteemed hip-hop producer Koen Heldens.

The result of countless development hours and listening sessions is a one-of-a-kind, beast of a compressor, that is up to the standards of one of the greatest producers of the moment, and that includes the best levelling amplifier that Black Rooster Audio has developed to date.

Make use of their 14-day trial and check out this incredible compression unit!

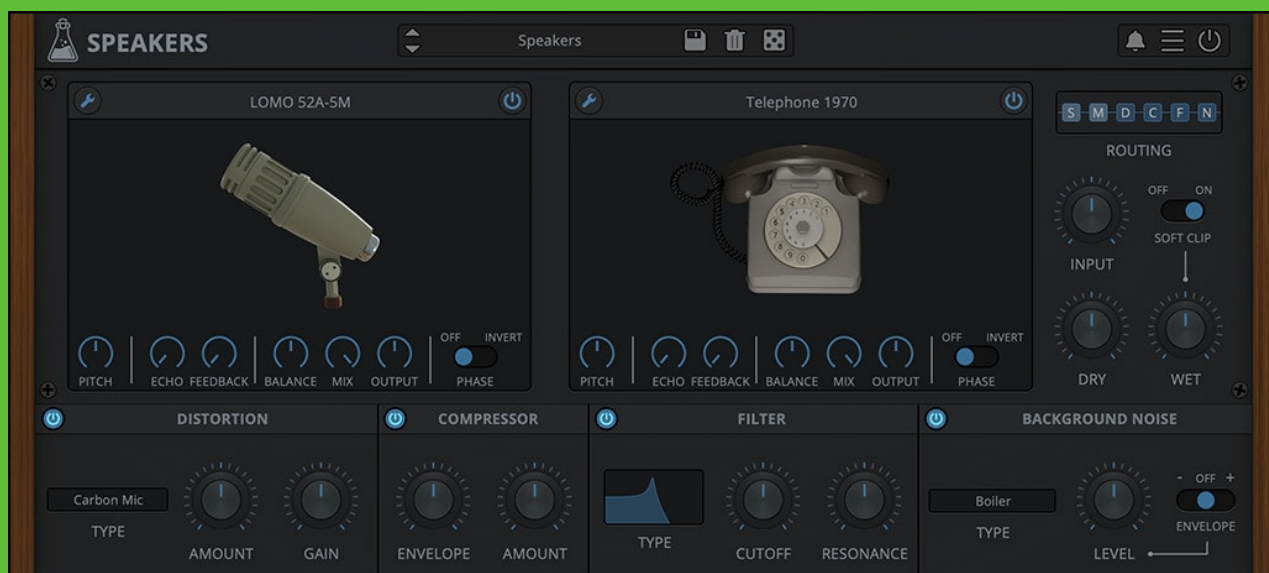

The KH-COMP1 has been launched with an intro price of \$109 instead of \$139 for a limited time only!

AudioThing releases Speakers

Speakers is a plugin effect designed to emulate a wide range of loudspeakers and microphones using our state-of-the-art convolution engine. Shape any sound like it's being played by an old telephone, radio, or classic cabinet; or shape it like it's being recorded by a vintage ribbon microphone or even a toy recorder. Speakers features a freely configurable effects chain, comprising compression, distortion, and filtering, as well as an array of looping background noises for setting the sound in a variety of environments.

Price: \$99. Speakers is available for the introductory price of \$59, until July 11, 2020.

HoRNet updates SongKey MK3 to v3.0.6

HoRNet Plugins has updated the SongKey MK3 Key, Chord and Tempo detection utility to version 3.0.6. The new version is a maintenance release and includes:

Fixed MIDI output stuck on C maj.

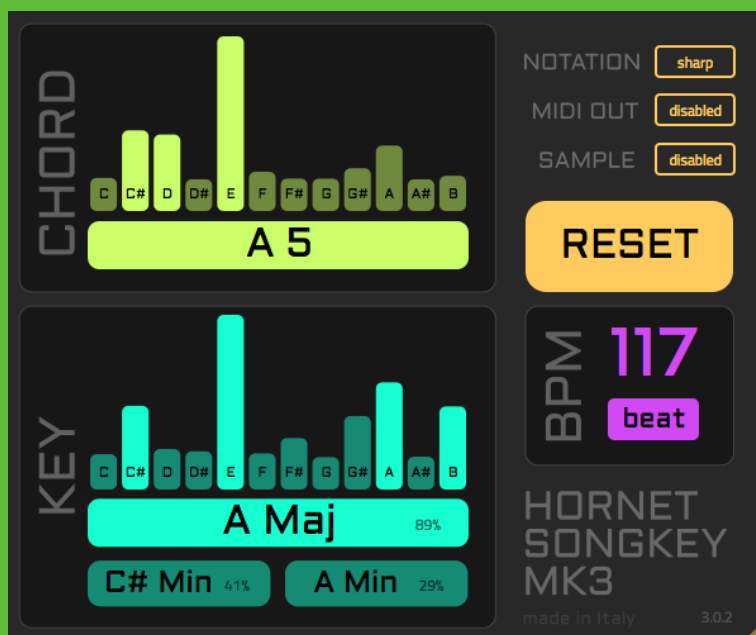

Fixed intermittent MIDI chord detection.

Fixed GUI not showing in Logic 10.5.

Fixed Audio Unit crash in certain hosts (Luna and MPC).

Fixed high CPU usage in VST3.

The update is free for owners of the plugin and can be downloaded from the user area.

discoDSP updates OB-Xd iOS to v1.3 and OPL FM Synth to 1.4 (with iOS support)

discoDSP has released OB-Xd 1.3 for iOS. New features include enhanced presets browser and scrollable GUI window.

discoDSP has also released OPL 1.4 for iPadOS, macOS, Windows and Linux as AudioUnits, VST, VST3 and Standalone. New features include: Added 2.000+ categorised presets by type; Added Preset folder browser; New GUI SVG background and Minor fixes and enhancements.

Get 70% off **The Wall** limiter - Only at PluginFox. Ends June 30, 2020.

The Wall is the simplest way to add transparent limiting to your tracks or buses.

The Wall is is a brick wall limiter designed with one thing in mind: Make your mixes loud without screwing up your mix. No matter what side of the loudness wars you've decided to plant yourself on, the need to make mixes loud for clients isn't going away any time soon. Sending your clients home with a mix that is just as loud as the professional mixes they are used to hearing is an important part of any mixing engineer's job.

The Really Useful Chord Progression Poster

CHORD PROGRESSION OVERVIEW

The Major and Minor scales are the most commonly used scales in Western music. Each of these scales contains 7 notes, and each of these notes form the 'root' of its own chord. Therefore, every Major and Minor scale has its own unique 'set' of 7 chords. There are 3 types of chord used within each set - major chords, minor chords and diminished chords. This sequence of chord types used in each set is dependent on whether the scale is Major or Minor, and is defined using a simple formula.

What is a chord? A chord is simply 2 or more notes played together, usually played at the same time. Although chords can technically contain many more notes, the most common type of chord is called a 'triad', named as such because they contain 3 notes. It is triads that we will exclusively reference throughout this poster. What is a chord progression? A chord progression is just 2 or more chords played in sequence. How that sequence of chords is determined, is up to the composer. However, using the 24 sets of chords below is a good starting point, as each set contains 7 chords that already work well together, because they consist of notes from the same scale. Move between sets themselves to change the flow and mood of your composition. Once you're comfortable with triads you can start to introduce additional chords (such as dominant sevenths) to increase the complexity of your music (for more information on extended chords, please refer to The Really Useful Piano Poster). There are no hard and fast rules you must follow, and this method represents just one of the ways to come up with unique chord progressions that you enjoy. This poster aims to provide the building blocks for improvisation - the rest is up to you.

Make your sounds warmer by adding extra harmonics with **Boost X**, the dynamic and smart saturation plugin from Initial Audio. Save 80% off and buy now for only £11.95 / \$15. Ends July 1, 2020.

Many other Saturation/Overdrive plugins use a static (stateless) algorithm that doesn't change depending on the audio passed through. Boost X is different, it reacts to the input audio and applies the perfect amount of saturation at the current loudness. This means even quiet sounds can be overdriven without any gain in loudness. Boost-X also compensates for perceived loudness, bringing the loudness down even further so you get nice rich harmonics added to your sound, without destroying the balance of your mix.

The advertisement features a dark grey background with a large red circular badge in the upper left corner containing the text "80% OFF". On the left side, the "INITIAL AUDIO" logo is displayed above the product name "Boost X" in a large, bold font. Below this, the text "A dynamic and smart saturation & overdrive" is shown. A small note "*Limited time only" is positioned above the "PLUGIN BOUTIQUE" logo, which includes a musical note icon. On the right side, a screenshot of the Boost X plugin interface is shown, featuring a large circular knob labeled "BOOST-X" and "AMOUNT". Below the knob, a "TYPE" dropdown menu is set to "Clean". A red price tag at the bottom right of the interface displays "£11.95 / \$15".
